## Suggestion for improvement

13 responses

Excellent presentation and relevant. Few practical examples would be more helpful

Need to go for practical exercise more and identification of the general loopholes already created earlier

Okay overall

We need practical sessions to practice

Such type of workshop/training frequently needed with current G.Os

During the course of training i realised a lot of rectification required in maintaining proper registers , so 2 days training will be much useful in practical aspects of proper maintenance of registers.

May include few case studies.

More such type of workshop will be helpful

More interactive sessions may help

Very informative training and useful for practical implementation.

Very good

Such trainings over regular interval regarding up-to-date G.Os may prove helpful.

Needs more training
