Suggestions for improvement

47 responses

Road

All good

Everything is good

More practical based ppt

Network Connectivity should be better

NA

This was good .

Very nicely conducted session.

It was quite a good session.

Step by step work is more effective in a chart manner.

WiFi network hampered the presentation. Had few confusion in dealing with the polygon and correction of polygon geometrics etc in technical session, which may be taken care of.

Not needed.

More such training required for atleast one week

The training on this subject should reach the grassroot level of the dept. along with demonstrations on server upload process.

It would be helpful if the level of training was for Division level, taking example for one division with one live case or adding some assets/unascertainable data in the portal.

It would be helpful if more focus is given to the content of the training.

More time for hands on and demonstration was required for dealing with the Portal Contents and taking participants through the website as opposed to creating kmIs and other essential but ancillary activities.

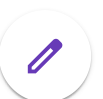

Accommodation should be need and clean.

All good 👍

All goods

Nice

road way

roadway

whole entire department was vary good and teaching techniques both practically and theoretically was high level. No any suggestions for improvement in my side.thank you

Good communication skills

JFMC ritthu forest & working

Jfmc ritthu forest workings

Dood

All are Good

I hope this type of training will help us in upcoming years.

Everything was fine

Improve your accomodation

All went good and was very helpful.

All good

Very good

The traning was good I ralley appreciate

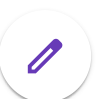

Accommodation need to be better other all are good.

Organise more workshop

Specially, bedrooms for ladies are not comfortable.

All the arrangements are satisfactory in this training session.
